Re: Auto Scheduler Advantage Software

Dear Auto Dealers,

I want to take a minute and recommend a software program I think all Ford Dealers should know about. It is called Auto Scheduler, a scheduling program that has profoundly impacted my dealership, my employees and my bottom line.

It's simple to install, simple to use and cost effective: Before this software, scheduling was a nightmare. Every one of you can relate to your employees running around, stumbling over each other and worrying about making customers wait. That problem in my dealerships is completely gone.

Auto Scheduler software has saved us as much as two hours a day per salesman.' The time was normally spent running from three different departments to get their car scheduled for detail. Now every salesperson goes to the Auto Scheduler, and in a few clicks they have scheduled their customer's time available time slot, and everyone gets it at the same time and it is scheduled. This has eliminated a lot of chaos and tension between the salespeople, and my entire team is on

In just over three hours we went from a manual system with 3 different sign-up sheets in three different departments to an extremely simple software program that saves us thousands of dollars a month in wasted time. It's also helped us reduce overtime. If I have a lot of cars scheduled for Saturday I can assign the appropriate number of techs for Saturday's schedule. If I don't have cars scheduled for Saturday I don't need to have anyone in that day.

Bottom-line? Our service to our customers is better and the relationship between our salespeople is better. We are a better dealership because of Auto Scheduler Advantage. It's provided great value and I highly recommend it.

Patrick Gilbert,
Tom Holzer Ford
